Career Objective

I am a fresher Full Stack Web Developer with skills in HTML, CSS, JavaScript, React JS, Python, and MySQL. I enjoy building responsive and user-friendly web applications and am eager to learn new technologies to grow as a developer. My goal is to contribute to real-world projects and create efficient, scalable web solutions.

Experience

• Python Full Stack Developer (Trainee)

Logiclock Labs Pvt. Ltd | July 2025 – Dec 2025

- Completed hands-on training in Python, Django, HTML, CSS, JavaScript, and MySQL, covering both frontend and backend development.
- Built responsive web applications with integrated databases.
- Developed mini-projects to improve problem-solving skills and full stack development workflows.
- Gained practical knowledge of frontend-backend integration and database management.

Projects

1. Event Management Website – Python, Django, Bootstrap

Designed and implemented an Event Management system using Django, focusing on clean UI, event search, and user-friendly registration forms.

2. Clinic Appointment Website - Python, Django, Bootstrap

Developed a Clinic Appointment Booking System using Django, enabling patients to schedule appointments, view doctor availability, and receive booking confirmations.

3. Hotel Website – HTML, CSS, Javascript

Created a user-friendly Hotel Website interface using HTML, CSS, and JavaScript, highlighting room types, pricing, and location map integration.

Skills

- Languages – HTML, CSS, Javascript, Python, PHP, SQL, C
- Frameworks – Django, Bootstrap, React JS
- Tools – VS Code, Sublime Text, PyCharm, XAMPP, MS Excel, POWER BI

Education

Bachelor of Technology (B.Tech.) – Rajasthan Technical University, Kota
Graduation Year: 2021 - 2025
